A series of heavy rain events towards the end of February caused the White River at Augusta to rise above flood stage during the beginning of March. The river crested at 27.99 feet on March 2nd.

Heavy rainfall from late February kept parts of the Cache River and White River above flood stage from late February through the beginning of March.

WOODRUFF COUNTY --- 0.7 WSW RIVERSIDE [35.28, -91.24], 1.1 NNE CAVELL [35.27, -91.24], 1.0 NNW PATTERSON [35.26, -91.24], 0.3 SW

Heavy rain during the first half of the month fell on an already high Cache River. The Cache River at Patterson remained elevated from a wet first two months of the year. The additional rainfall in March pushed the Cache River at Patterson above flood stage for a few days in the middle of March.

Heavy rain during the first half of the month caused minor flooding along the Cache River at Patterson.

(AR-Z014) STONE, (AR-Z033) WHITE

03/16/13 08:30 CST 0 Wildfire

03/16/13 19:30 CST 0

Vegetation that was mostly dormant, gusty winds, and low humidities made conditions favorable for wildfires on the 16th. Two fires exceeded 100 acres. In White County, the White No. 1 Fire burned 150 acres 6 miles southwest of Searcy. In Stone County, the Iron Mountain Fire burned 123 acres 1 mile west of St. James.

Low pressure approaching from the west caused moisture from the Gulf of Mexico to ride up over cold air at ground level in Arkansas on the 21st. Central and southern Arkansas received mainly a cold rain, through some sleet was mixed in at times. The situation was much more complicated in northern Arkansas, where a relatively brief mixture of rain, sleet, and snow changed over to all snow during the evening of the 21st. A Winter Storm occurred in Baxter, Fulton, Izard, and Sharp counties, where snowfall totals exceeded 4 inches. In the area around Salem (Fulton Co.), amounts were in the 6 to 10 inch range. Mammoth Spring (Fulton Co.) measured 7 inches, while totals around Gassville (Baxter Co.), Hardy (Sharp Co.), and Melbourne (Izard Co.) reached 6 inches. In the Mountain Home area (Baxter Co.), totals were in the 4 to 6 inch range. Elsewhere across northern Arkansas, most snowfall totals ranged from 1 to 3 inches, except for a few greater amounts at the higher elevations. During the wee hours of the 22nd, most of the snow changed over to areas of freezing rain, but accumulations of ice were minimal. By dawn on the 22nd, most precipitation had changed to rain.

03/24/13 07:00 CST 1.23M Strong Wind (MAX 41 kt) 03/24/13 20:00 CST 0

The difference in pressure between low pressure to the northeast of Arkansas and high pressure to the southwest of the state caused very windy conditions from the morning of the 24th into the evening hours. Many thousands of people lost electricity, but most of the outages were repaired by the middle of the evening on the 24th. Peak wind gusts at airport stations included 47 mph at Little Rock, 44 mph at Pine Bluff and Stuttgart, and 43 mph at Little Rock Air Force Base.
